TACTICAL ATMOS EDGE NODE

Rugged ATMOS

The Rugged ATMOS is a compact, mission-scalable solution designed for critical mobile operations, reducing the space needed for computing by over 10x. Each ATMOS node features 32 physical Intel® Xeon® Gold cores with onboard UPS battery backup for uninterrupted C2 on-the-move.

The integrated chassis rail system secures the nodes together, eliminating the need for an outer transit case and enables the stacking of unlimited independent ATMOS nodes, creating a powerful, portable data center. The ATMOS server features the smallest form factor with the highest CPU core count in the industry.
